

WILLIAM ISRAEL CASTAÑO BALANTA

Senior Full Stack & AI Engineer | Software Architect

Cali, Colombia | williamisrael210@gmail.com | +57 3023424366

Portafolio: <https://willcast7.github.io/portff/> | GitHub: github.com/willcast7

PROFESSIONAL SUMMARY

Software Engineer and AI Engineer with over 11 years of experience in SQL databases and more than 6 years leading the full software development lifecycle. Specialized in designing, building, and evolving corporate and financial ecosystems by merging backend engineering, software architecture, and artificial intelligence. As a technical leader and reference, I structure services applying Specification-Driven Development (SDD) and the C4 model under ISO 25010 quality standards. Furthermore, I possess extensive experience integrating Artificial Intelligence into business workflows, designing Retrieval-Augmented Generation (RAG) architectures with pgvector, Spring AI, and local LLMs to develop AI-Driven solutions that optimize complex processes and generate value on an international scale.

TECHNICAL SKILLS (Core Competencies)

- **Architecture & AI:** AI-Driven Dev, RAG, pgvector, Spring AI, Local LLMs, C4 Model, SDD, ISO 25010.
- **Backend:** Java (Spring Boot, Spring WebFlux), TypeScript (Node.js), PHP, C#.
- **Frontend:** Angular, React, Vue, JavaScript.
- **Cloud, DevOps & Infra:** AWS, Docker, Docker Compose, Nginx, GitFlow, VPS.
- **Databases:** PostgreSQL, SQL Server, MongoDB, MySQL.
- **Methodologies:** Scrum, Kanban, Kaizen Philosophy.

PROFESSIONAL EXPERIENCE

PersonalSoft (Banco BTG Pactual) | Software Architect / Senior Developer

November 2025 – Present

- Modeled and documented banking service architecture using the C4 model (C1-C3) and comprehensive flowcharts, standardizing the ecosystem's structural vision for technical teams.
- Established architecture guidelines and functional specifications using Kiro under the Specification-Driven Development (SDD) framework.
- Accelerated the delivery of mission-critical backend services by integrating AI-Driven Development practices, ensuring maintainability and high code quality.
- Audited and optimized integrations with external financial products, executing technical refactoring plans that increased system performance and stability.

AureaLab | Founder & Lead Developer

July 2021 – present

- Founded and direct a B2B technology initiative, managing the full lifecycle of custom applications such as InvSalud (pharmaceutical inventory management) and Kayros (cash control and operations).
- Designed and implemented search engines and document processing systems integrating RAG architectures, utilizing vector databases (pgvector), Spring AI, and local language models (Ollama).
- Automated production infrastructure deployments by configuring multi-container environments with Docker, Docker Compose, Nginx (Reverse Proxy), and SSL certificates on VPS servers.

- Developed multi-channel automated notification systems, integrating Spring Boot scheduled tasks, WebSockets, and the WhatsApp Business API.

GVS Colombia | Developer Engineer

January 2025 – November 2025

- Led the integration of mission-critical external APIs (WhatsApp API, SAP, Yeastar) with core internal products.
- Designed and implemented Artificial Intelligence-driven conversational bots for customer service and corporate process automation.
- Refactored legacy applications by implementing SOLID principles, achieving scalable codebases that facilitated technological migrations with zero downtime.

Punto Red | Full Stack Developer

May 2022 – August 2024

- Orchestrated the integration of banking services via ISO 8583 protocols and REST APIs, executing the structured migration (API-fication) of critical platforms to AWS cloud environments.
- Optimized internal operational workflows through Python and Pandas automation scripts, significantly reducing manual processing times.
- Directed frontend implementation for client self-service portals, ensuring high fidelity to UX/UI business requirements.

Notable Previous Experience (2015 – 2022)

Spartan Hill / SIESA / Grupo Empresarial MR: Over 7 years of additional experience managing databases and developing Full Stack solutions. Led technical integration with Binance and AWS for the Plutowallet crypto platform, executed PHP to C# migrations for clinical ecosystems, and automated corporate software deployments in Java.

EDUCATION

- **Computer Engineering** | Universidad de Cataluña | Currently Enrolled
- **Software Programming** | MINTIC | 2022
- **Systems Technician** | SENA | 2012

LANGUAGES

- **English:** B2 (Advanced focus on technical communication for software engineering).
- **Spanish:** Native.
